Education in a technological world: communicating current and emerging research and technological efforts

FORMATEX

Edited by

A. Méndez-Vilas
CONTENTS

Introduction........................................................................................................................... IX

A Case Study of A Navigator’s Sea Aptitude Using Body Response to Visual Simulation
Koji Murai and Yuji Hayashi.................................................................................................. 1-8

A Case Study on the Curriculum Development of ICT Education with Special Emphasis on Spiral-Approach
Fumihiko Shinohara.............................................................................................................. 9-16

A community of learning in multicultural management education; collaboration in virtual space
L.J. Kemp............................................................................................................................... 17-25

A MUVE in service of Teacher Professional Development: How engaging is teaching role-playing instruction in Second Life?
V. N. Vastileiou and F. Paraskeva...................................................................................... 26-33

A simulator for explaining organic chemical reactions using qualitative reasoning approach
Alicia Y.C. Tang..................................................................................................................... 34-41

A tale of two ICTEd4D projects
L. Dalvit, I. Siebörger and H. Thinyane............................................................................ 42-48

A Virtual Learning Environment for English Philology students
Maria Luisa Renau Renau..................................................................................................... 49-55

Ambient Learning Spaces
T. Winkler, F. Scharf, C. Hahn and M. Herczeg................................................................. 56-67

An exploratory essay on Cloud Computing and its Impact on the use of Information and Communication Technologies in Education.
E. Martins Morgado........................................................................................................... 68-71

Analysis of new scene educational concerning Internet: center "Guadalinfo"
Antonio Luque de la Rosa.................................................................................................... 72-76

blogs and wikis: ICT tools to facilitate critical thinking and learning in a web-based health services and information management curriculum
Paul David Bell, Xiaoming Zeng and Susie Harris............................................................ 77-82

Clicker technology: The tool to promote active learning in the classroom
S. Simelane and D.M. Dimpe............................................................................................... 83-89

Cognitive engagement and questioning online
J. Mason............................................................................................................................... 90-99
Conjecture-generation through Dragging and Abduction in Dynamic Geometry
A. Baccaglini-Frank and M.A. Mariotti……………………………………………………… 100-107

Copyright Issues on Multimedia Production: Strategies for Intellectual Property Management
Joni de Almeida Amorim and Dilermando Piva Jr. …………………………………… 108-114

Creating good digital citizens
Terry O’Brien and Bruce Stavert…………………………………………………………… 115-119

Critical Thinking: The Foundation of Education in a Technological World
J. R. Reid and P. R. Anderson……………………………………………………………… 120-126

Decision table for adaptive e-learning systems
P.Ardimento, N.Boffoli, V.N. Convertini and G.Visaggio………………………………… 127-134

Defining Costs and Benefits for the Economic Evaluation of TEL Environments
J. Cockbaine………………………………………………………………………………… 135-141

Distance Education. A cognitive view
Maria del Carmen Malbrán………………………………………………………………… 142-146

E-learning in Medical Education and Blended Learning Approach
A. I. Albarrak…………………………………………………………………………………. 147-153

e-learning: What does it mean to learn and teach with technological tools?
N. Wright…………………………………………………………………………………… 154-160

Embarking on the Randian hero of cloud based education
Kjersti VanSlyke-Briggs………………………………………………………………….… 161-164

EMITEL project: global educational resources in the field of medical engineering and physics
M. Stoeva, A. Cvetkov, S. Tabakov, C. Lewis and P. Sprawls……………………………. 165-168

Employing technology to facilitate empowered and critical learning for pre-service teachers
P. Mannix-McNamara and R. Lynch……………………………………………………….. 169-174

Empowering women through ICT: strategies and methodology to recover women’s historical memory in rural areas
Annachiara Del Prete and Colin Calleja………………………………………………….. 175-179

Enabling students with SEN through the use of Digital Learning Resources:
Guidelines on how to select, develop and use DLR with SEN
Jaime Ribeiro, Ana Margarida Almeida and Antônio Moreira…………………………… 180-189

Examining upper elementary students’ gameplay experience: A flow theory perspective
Meixun Zheng, Hiller A. Spires and Angela Meluso……………………………………… 190-198
Expanding Access to Distance Learning using Learning Objects
Fernanda Campos, Regina Braga, Neide Santos and Ana Cláudia Souza....................... 199-206

Experiences with the use of technology in English classes
Liliana E. Pace and Milagros Romero................................................................. 207-210

Factors Explaining Teachers' ICT Use and Productivity in Technology-Enriched Classrooms
Rivka Wadmany................................................................................................. 211-215

Ghanaian Senior High School students’ access to and experiences in the use of Information and Communication Technology
Sarfo F.K. and Ansong-Gyimah K. .............................................................. 216-223

Graduate outcomes in an online course in health professions education
Z. Siddiqui........................................................................................................ 224-230

Helping psychology students improve their statistics performance: A test of the ExoStats web-based training environment
M. Delaval, O. Le Bohec, Y. Noël, N. Michinov, A. Guida, S. Musca and V. Dodeler…… 231-236

How to address Integration of ICT in Teaching Practice? Research on Factors influencing the use of ICT in Education
Jef Peeraer and Peter Van Petegem................................................................. 237-244

Human-information interaction: An emerging focus for educational cognitive tools
Paul Parsons and Kamran Sedig...................................................................... 245-251

ICT Resources for Educational Purposes
M.L. Cacheiro González.................................................................................. 252-259

Incorporating mobile technology for college science laboratory instruction: Our experience using an interactive multi-media system
I.U. Willcockson, R. Zeng and M.S. Iyengar.................................................... 260-265

Institutional challenges facing online Education
Bassou El-Mansour......................................................................................... 266-269

Learning Preferences and Learning Styles of Online Adult Learners
Yasemin Gülbahar and Ayfer Alper............................................................... 270 - 278

Learning, dynamic assessment and Serious Games
L. Anolli and L. Confalonieri......................................................................... 279 - 287

Lessons Learned from the STEAM Project: Development and Deployment of Digital Learning Games for Effective Learning Improvement
William Young II, Teresa Franklin, Chang Liu and David Chelberg.................. 288- 299

Management information systems supporting youth at risk and the hard to engage
D. Passey........................................................................................................ 300-312
Micro-documentary as learning resource
Silvio Henrique Fiscarelli, Maria Helena S.S. Bizelli and Patricia Eliane Fiscarelli… 313-320

Perceptions of students and teachers about the use of a kid’s programming language in computer courses
Tayfun Akcay and M. Yasar Ozden……………………………………………………… 321-336

Positive Digital Identity Development on Web2.0 Cloud
Danuše Bauerová……………………………………………………………………… 337-348

Problem solving and critical thinking in a technological world
M.A.C. Mamede-Neves and M. A. Fernandez……………………………………….. 349-355

Programming and Robotics with Scratch in Primary Education

Providing guidance on Backstage, a novel digital backchannel for large class teaching
D. Baumgart, A. Pohl, V. Gehlen-Baum and F. Bry…………………………………. 364-371

Quality indicators within the use of open educational resources in higher education
E.Ossiannilsson and A. Creelman…………………………………………………… 372-382

ReadIT – a developing and testing method for training reading comprehension strategies

Role of OLPC to Empower ICT Adaptation in the Primary Education
K. P. Hewagamage, H.M.S.J.Meewellewa, G.K.Munasinghe and H.A.Wickaramachi… 391-398

Self-concept of competence of higher education students learning in virtual environments
Ana Cristina Almeida and José António Moreira………………………………… 399-405

Stakeholder support during the implementation of web-based courses in higher education
S. Simelane……………………………………………………………………………… 406-413

Students learning with mobile technologies in and out of the classroom
Julie Mueller, Eileen Wood, Domenica De Pasquale and Karin Archer……………… 414-420

Study of the impact on student learning using the eRubric tool and peer assessment
J. Serrano Angulo and M. Cebrián de la Serna……………………………………… 421-427

Systematic analysis of Quality Technology Enhanced Learning Environments in higher education: an organizational perspective 2.0
Sérgio André Ferreira and António Andrade………………………………………… 428-439

Teacher’s selection and use of Internet-based resources and tools to facilitate learning in primary classrooms
Teaching and learning in information society: the importance of self-regulation and self-efficacy
Maria Cristina Rodrigues Azevedo Joly and Eli Andrade Rocha Prates .......................... 448-456

Technologies for education without distance barriers.
Ronei Ximenes Martins and Maria Cristina Rodrigues Azevedo Joly .............................. 457-466

Technologies involving parents and guardians with their children’s learning
D. Passey ......................................................................................................................... 467-477

The concept of instrumental conflict: an application of the theory of activity to
technology-supported teaching-learning situations
P. Marquet and B. Coulibaly ............................................................................................ 478- 490

The Emergence of Smart+Connected Learning
V. Amato ....................................................................................................................... 491-497

The Geocadabra Construction Box: Open source dynamic geometry interface within
a 3D visualization program for elementary children
Jacqueline Sack and Irma Vazquez ................................................................................ 505-512

The impact of technology on teaching and learning languages
Manouchehr Tabatabaei and Ying Gui ............................................................................. 513-517

The importance of design for educational games
R. Haworth and K. Sedig ................................................................................................. 518-522

The Photopoetics of Dance in Education: “Dance is like painting a picture with your
body.”
Cheryl Kay ....................................................................................................................... 523-530

The power of social media in informal learning
Özge Yaşar and Şirin Karadeniz ...................................................................................... 531-538

The role of abduction in realizing geometric invariants
Nam Nguyen-Danh ......................................................................................................... 539-547

The Technological Challenges In Mobile Networks And Communications In View Of
Unleashing The Full Potential Of M-learning
N. Mohamudally ............................................................................................................. 548-555

The Use of Social Networking Technologies within a tertiary education environment
S. Leitch ......................................................................................................................... 556-562

Towards a Roadmap for implementing a Socio-constructivist learning framework for
chronically ill children to learn with their classmates while still in hospital
Pinto, R., Whitelock, D. and Gutierrez, R. ................................................................. 563-571
Use of a Classroom Response System (CRS) for teaching Mathematics in Engineering with large groups  
J I Barragués, A Morais, J Manterola and J Guisasola…………………………………………………………572-580

Using ICTs in Middle School Literacy Programs  
J. Hughes and A. Burke……………………………………………………………………581-587

Using narratives from social network to manage teacher-student interaction  
Ananda Mitra………………………………………………………………………………588-592

Videoconference uses for medical permanent training  
J. Aramberri and M. León……………………………………………………………………593-598

Visualizing the invisible nanoworld: ICT-enhanced reflection of imaging and images of atoms in nanoscience  
M. Euler……………………………………………………………………………………599-606

Web-based adaptive self-assessment in Higher Education  
Catherine Marinagi…………………………………………………………………………607-614

Web-based applications of 3D visualization and virtual reality in science education  
Y.Y. Yeung…………………………………………………………………………………615-623
INTRODUCTION

The present edition belongs to a more general line of books published by Formatex (Badajoz, Spain), aimed at communicating current scientific and technological research in a generalistic-didactic way, in diverse areas. In this number, it aims at stimulating the presentation, exchange and dissemination of information and experiences on the applications of technology in educational settings. Articles dealing with the following topics were called for:

General Aspects and Assessment of ICT use in Education

Pedagogical Strategies in ICT Education

Methods and Environments for Education and Training

Educational Software/Webs Experiences

Technologies in the Service of Education

Development and Application of Web 2.0 Technologies for Educational Purposes

Software Content Creation and Teaching and Learning Strategies in Science and Engineering
e-Portfolios
Medical e-Learning

We hope that you will find the articles included in this edition interesting and stimulating, and look forward to receiving new proposals for future editions,
